

BVLGARI

ENVIRONMENTAL, HEALTH AND SAFETY POLICY

Bulgari is committed to conducting its business in a manner that delivers leading Environmental, Health and Safety performance. This is consistent with our commitment to corporate citizenship, social responsibility and sustainability.

Health and safety

Due to the fact that Bulgari values human life above all, it is our goal to absolutely avoid work-related incidents and injuries, training our employees and building a supportive work environment. We constantly work to identify and eliminate health and safety risks.

Moreover we foster a culture that encourages safe, healthy and environmentally responsible behaviour by clearly defining the responsibilities of all employees. In fact, while the ultimate responsibility for safety health and environmental management lies with the management, all employees bear responsibility for their own safety, that of their colleagues and protection of the environment.

Environment

In order to extend and enhance human life we responsibly use natural resources and we help to conserve them through efficient use and careful planning in all our business processes, facilities, operations and products (water waste management, paper recycling, etc.).

Thus, it is our commitment to provide customers, contractors and suppliers with information to ensure that our products are distributed, used, and recycled or disposed of in a safe and environmentally sound manner.

Communication and improvement

We integrate these objectives into our business planning, decision making and all our daily business activities in order to improve our result.

We foster open dialogue and communications on workplace health, safety and environmental issues with our shareholders to share information and respond to their concerns and suggestions
